

Action plan submitted by özge çeltik for DÜZCE MEVLANA MESLEKİ VE TEKNİK ANADOLU LİSESİ  
- 25.03.2020 @ 11:48:16

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security Pupil and staff access to technology

- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at [www.esafetylevel.eu/group/community/use-of-removable-devices](http://www.esafetylevel.eu/group/community/use-of-removable-devices) to make sure you cover all security aspects.

### Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › It is good that your email system is protected and that you have a policy for the transfer of pupil data in place. In this regard, it is important to draw up guidelines so that all staff are clear about what to do if they discover inappropriate or illegal content on school machines. For further information see the fact sheet on Protecting sensitive data ([www.esafetylevel.eu/group/community/protecting-sensitive-data-in-schools](http://www.esafetylevel.eu/group/community/protecting-sensitive-data-in-schools)).
- › It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.
- › It is good that all users are attributed a different password by the system in your school. Remind all school

members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

## Software licensing

- It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

## IT Management

- In the interests of innovative pedagogical practice, it may seem necessary to allow staff and pupils to upload software to school-owned hardware, however this should only be done by the person in charge of the school ICT network in conformity with the School Policy. Staff and pupils should be aware of this through the Acceptable Use Policy they are required to sign. All new software uploaded to school equipment needs to be in conformity with licensing requirements.

# Policy

## Acceptable Use Policy (AUP)

- It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

## Reporting and Incident-Handling

- It is important to have a school-wide policy on handling issues when pupils knowingly or even inadvertently access illegal or offensive material online, since standards and practices can vary considerably from one teacher to the next. Guidance on this topic is provided on the [teachtoday.de/en](https://teachtoday.de/en) website ([tinyurl.com/9j86v84](https://tinyurl.com/9j86v84)). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form ([www.esafetylabel.eu/group/teacher/incident-handling](https://www.esafetylabel.eu/group/teacher/incident-handling)) so that other schools can benefit from your experience.
- Keep a central log of any cyberbullying incidents which will help to inform staff about the extent of any potential issues and the type of pupil, age etc. that are affected. Also, be sure that you fill in the eSafety Label [Incident handling form](#). Your input will contribute to building a data base of successful incident-handling practices from schools across Europe that you can use in the future.

## Staff policy

- In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.
- It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading

evidence tool, also accessible through the [My school area](#).

- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school ([www.esafetylabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylabel.eu/group/community/using-mobile-device-in-schools)).

## Pupil practice/behaviour

- › Your school partly has a school wide approach of positive and negative consequences for pupil behaviour. This is a good start, make sure that the policy and associated hierarchy applies to all on- and offline issues and is shared widely and re-visited by all staff and pupils at least annually.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

## School presence online

- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks ([www.esafetylabel.eu/group/community/schools-on-social-networks](http://www.esafetylabel.eu/group/community/schools-on-social-networks)) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

# Practice

## Management of eSafety

- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at [www.esafetylabel.eu/group/teacher/incident-handling](http://www.esafetylabel.eu/group/teacher/incident-handling).
- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

## eSafety in the curriculum

- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.

## Extra curricular activities

- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.
- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at [www.esafetymlabel.eu/group/community/pupils-use-of-online-technology-outside-school](http://www.esafetymlabel.eu/group/community/pupils-use-of-online-technology-outside-school).

## Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

## Staff training

- › All teachers should be able to recognise signs of cyberbullying and be aware on how to best proceed. Make sure that your teachers are regularly trained bearing in mind the rapid changes of new technology. Also check the eSafety fact sheet on Cyberbullying at [www.esafetymlabel.eu/group/community/cyberbullying](http://www.esafetymlabel.eu/group/community/cyberbullying).

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the**

**Forum, and your reporting of incidents on the template provided are all also taken into account.**
